Stories teach how to act

Pictorial Stories to impart Value Education

4000+ pictorial stories that enable you to impart value education to your students

My School has the largest creation of interesting picture stories that requires less or no reading. These are specially created for children who are too young to read or those who find reading a struggle. All the stories are ideal to use digitally (through any media) for the entire class, a small group of students or for an individual.

Teachers can frame their own comprehension questions from each story, enabling children to be engaged with language. You can watch the expressions of your reluctant reader change from boredom or fear to delight.

Organise interactive story telling sessions in your classrooms!

- Mathematic puzzles and more...

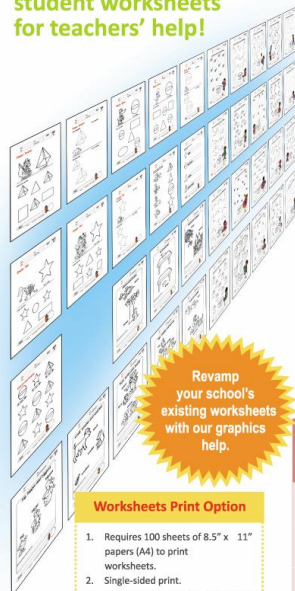

Key note:

- 300+ types of vivid age appropriate visual activities of all kinds – available at one place

Worksheets make practice perfect

Ready-to-use worksheets for teachers, parents & students

20000 + Print-ready student worksheets for teachers' help!

Revamp your school's existing worksheets with our graphics help.

Worksheets Print Option

1. Requires 100 sheets of 8.5" x 11" papers (A4) to print worksheets.
2. Single-sided print.
3. About 6 seconds to print each worksheet.
4. Black & white or colour printout (one side is preferable).

Children take up learning activities or study according to the given modules as part of assignments and preparation for examinations. That is where these visual worksheets come in handy.

One child may be interested in word building and another one in reasoning, for instance. Let the children choose worksheets depending on the topics of their interest or the subjects in which they would like to improve. If it is a subject dear to their heart, they will become a walking and talking encyclopedia on that subject!

Check out curriculum worksheets prepared by My School, which are perfect for helping children learn various concepts through adequate practice.

Play school Worksheets

There are currently 8 pre-school categories to choose from. For each category, you can do a single page activity, 4 pages flash cards, or cut and paste activity sheets. You can choose more than 100 worksheets from these sections.

- Pre-school Shapes Worksheets
- Number and Pre-math Worksheets
- Pre-school Concepts Worksheets
- Pre-school Colouring Worksheets
- Pre-school Alphabet Worksheets
- Pre-school Motor Skills Worksheets
- Pre-school Thinking Skills Worksheets
- Pre-school Activity Worksheets

Important print information about worksheets

You can use thousands of ready-to-use worksheets suitable to children in all sorts.

All pre-designed worksheets are available in colour as well as in black & white.

You can get access to all icon images from the archives to make customized worksheets.

Extra printing options (printer-friendly pages and flexibility in enlarging images).

Pre-primary Worksheets

There are currently 38 categories of pre-primary worksheets to choose from. Each category either teaches a specific skill or task, or gives a brief description to the students. You can print them to make single page activity worksheets, multiple flash cards or cut-and-paste activity sheets of each category for students. You can choose from more than 1,000 worksheets in these categories.

- Alphabets
- Maths
- Shapes
- Colours
- Basic Concepts
- Phonics
- Cursive Writing
- Time themes
- I can draw (Tracing objects)
- Complete name of the objects
- Odd one out
- Missing letters

Build memory with flash cards

Print & use Flash Cards for Teaching & Learning

Teaching with Interactive Flash cards!

Packed with high quality graphics and ideas, flash cards can be specially created for use by teachers in conjunction with various subject topics. Each card clearly outlines the learning objective and a resource required, and provides advice to the activity leader. It has variations and ways to make the activities easy or difficult, with which all the students can play and learn.

Dealing with children is challenging and requires thought blended with imagination. A child's mind is not developed enough to deal with intense coordination with anything. Teaching with flash cards or knowledge cards is a Game-Feel-Program for effective brain management in children.

FLASH CARDS PRINT OPTION-1
1. Single-sided flash cards.
2. About 10 minutes to print and cut.
3. Requires 50 sheets of 8.5" x 11" papers (A4) to print 100 flash cards.
4. Black & White or Colour (one side only).

FLASH CARDS PRINT OPTION-2
1. Double-sided flash cards.
2. About 11 minutes to print and cut.
3. Requires 50 sheets of 8.5" x 11" papers (A4) to print 100 flash cards.
4. One side is Colour and the other side is Black & White.

My School provides cost effective single print & double folded flash cards and knowledge cards for uses to print from any ordinary printer and tear into four pieces, to use them classroom teaching.

Printing Requirement
Requires 50 sheets of 8.5" x 11" papers (A4) to print 100 flash cards.

Select, print and laminate on your own!

Print colourful flash cards on innumerable topics like colours, shapes, animals, birds, plants, vehicles, flowers, fruits, vegetables, monuments, insects, professions and many more for enhanced subject wise teaching.

All flash cards can be laminated for durability.

1000+

Flash cards and knowledge cards are available for early child visual & teaching learning

PROJECT PUBLISH PRINT PRACTICE

- Subject wise Game-feel learning cards made for beginners
- Innumerable topics are available for teachers choice
- Design-ready flash cards for print, laminate for durable use
- Created with quality images with child friendly soothing colours

Key note:

Users can design their own cards with Help of Myschool's Flash card templet maker

Rhymes make Dance & sing

- Sleep, Baby, Sleep
- Cradle Song
- The Evening Is Coming
- Now the Day is Over
- Down with the Lambs
- Quiet the Night
- Golden Summers
- Good Night

Number Rhymes

Though toddlers cannot interpret the words used in rhymes, they actively respond to the rhythms in them.

When combined with music, children anticipate recognising the sounds, which are the first steps in the development of speech. Pronunciation, expression of thoughts and self-confidence in public speaking are the added advantages of nursery rhymes to a child.

Choose rhymes based on your monthly lesson themes

Bedtime Rhymes

- Twinkle, Twinkle
- Star Light
- I See the Moon
- The Man in the Moon
- Wee Willie Winkie
- The Sandman

Key note:

- Schools can decorate class room walls and pillars with the grate people portraits

Explore science through experiments

Make your classroom digital and view from anywhere

Teach, see & learn Animated science experiments

My School has created 3D Virtual Science Experiments suitable to the syllabus of every school. Special care has been taken to enhance the student's analytical ability and scientific aptitude through animated exercises. These virtual laboratory experiments improve the student's thematic and activity-oriented approach towards learning experiment with definitions and recapitulating scientific terms.

After displaying in the classroom, you may print them for your students' reference.

All 3D experiments are thoroughly reviewed and updated by subject experts, educationists and resource persons. They are designed for students of 6th, 7th, 8th, 9th and 10th classes in accordance with NCERT syllabus. They are of great use in classrooms & science fairs.

Now it's possible!

Upon completion of a demonstration, the subject teacher may print and distribute copies to the students for reference.

2D&3D

Step by step animation lessons for classroom white board & print for school projects

PROJECT PUBLISH PRINT PRACTICE

- Step by step 2D animation lessons for students practice
- Printable science experiments for classroom science projects
- Teacher manuals for elementary science experiments

Key note:

Myschool certified 3D lesson plans are available from valued project Partners

Brain mapping means one page learning

Brain Mapping Image Resources for 1st to 10th Class

What is brain map?

Brain map is a figure used to symbolize key words, ideas, concepts or other items linked to and arranged around a central concept. Brain maps are used to create, imagine, structure and categorize concepts. It is an aid to understand, study and organize information.

How to read brain map?

Chapter name is in the centre. Brain branch is at the top right. Start there and go clock wise - brain branch, corresponding sub branches, then sub-sub branches and key points. On the branches, key points, pictures and images are given. Read and understand them accordingly.

Each topic of the chapter is in different colour with all the important concepts and points to understand clearly.

Why Brain Maps?

Brain maps are used by millions of students which are encouraged by their teachers too. Brain maps are so effective because brilliant structure directly corresponds to our brain stores and recaptures information. Brain map allows to understand the concepts better and conveys hierarchy, association and relationships between topics.

6th-10th Brain mapping image Resources for conceptual teaching and Learning

PROJECT PUBLISH PRINT PRACTICE

- Brain maps are so effective because brilliant structure directly corresponds to our brain, stores and recaptures information. Brain map allows to understand the concepts better and conveys hierarchy, relations between topics.

DEVELOPED FOR UDL (Universal Design for Learning)

Teaching in sign language can extend the quality of the educational foundations among deaf

All class 1 to 10th teaching learning animated videos are available

UNIVERSAL LEARNING
All children should have equal Opportunity to get a Quality Education.

"Indian English Language mixed with 3d enriched virtual models to the Comprehensive Content"

Concept Approach

Hearing Impaired Students face several problems understanding and using the available information appropriately. Therefore, to help these students, an e-learning environment was developed and designed to meet all the needs of deaf students by adding abundant or enhancing sign language features in the e-learning environment.

Its Importance

Presently only 387 schools are trying their best to provide teaching and learning through sign language procedures. Out of 3,00,000+ hearing impaired students, these schools serve less than 1.5 lakh.

One of the biggest challenges in teaching to deaf students is the lack of sign language interpreters.

MySchool's Specially designed e-learning content can contribute greatly in upbuilding the education content accessible to this specially abled students.

Uses

Children, can gain equity in education and it instills confidence in becoming productive members of society.

Children can interact with one another and easily communicate with teachers resulting in Social development through communication Skills upbuilding.

Helps students in overall development through engaging eye-catching videos with Sign Language in academic subjects.

Useful not only for Students studying in school but also for youth preparing for competitive and Career Exams.

Content Specifications

1. All classes are designed / developed with Indian sign Language and integrated with syllabus of states and CBSE.
2. The most eye-catching movie-like animated videos.
3. Simple to understand by using sign language techniques, and generalizing the critical topics to flexible reading to obtain better score in exams.
4. Self-learning-based 3D animation videos mixed with sign language.
5. Efficient Content following Educational standards in Indian Sign Language introducing innovation into teaching and learning process.
6. Supported by certified sign language experienced interpreters.

Package Details

1. Written and visual 3D –content
2. E-learning content accessible on all devices (Smartphone, Tab, Laptop and Desktop)
3. Videos with instructional material in sign language.
4. Technology adaption for computers and communications.

Early career in Fusion art

Make your hobby grow into a early career!

26 weeks Animation art program with Micro Schedule and Teacher Training Material available for schools & institutions

Now turn your hobby into a career

Today, be it television movies or video and computer games, the magic of animation is present everywhere. Most of the students are immensely involved in this form of media. Yet there are many who have the curiosity to understand this technology better and to learn creating it. All they need is an opportunity to unleash their creativity.

We, at Myschool, have observed the way students of different age groups respond to animation: This understanding is also called as animation logic that works parallel with the concepts learnt at each grade level.

The process of learning animation simultaneously helps the students in learning various types of content including:

Math & Magic

The magic of numbers will help students understand the concepts of 24 frames which is equal to one second of animation creation. Thus, the students' comprehension of multiplication, division and fraction will make his/her learning simpler.

Creative Art & Craft

Animation is all about creativity. The use of beautiful colour combinations, the understanding of hues, drawings and visualizing abilities will help the students in creating a masterpiece.

Reading & Writing

The aim of every animation is to bring a story out of it. The concept of storytelling, creation of characters and setting will help the student to harness his creativity and express his thoughts and pave way to a better vision.

Science & Technology

Before the student crosses grade levels of six, he / she is already aware of extremely high level scientific principles through the concept of animation. The process of learning involves visual perception, cameras and projection technology that improve the comprehending level of the student.

Physics @ Every Stage

Even the most complex ideas like laws of physics and limitations of movement, velocity, gravity and metamorphosis come into play when the student is experiencing fun at animation by the second or third time. By then, the student begins to apply the laws of natural world to the theme of animation!

Benefits with My school Makers :

- Teachers can create their own worksheets, Charts, Story books with drag and drop required images from thousands of assets library into pre-designed Maker skeleton templates.
- Curriculum Creator / Micro Scheduler:
- This also has an innovative feature of creating Digital Curriculum through Drag and drop feature from Image bank.
- Presentation through Digital whiteboard from Curriculum maker gives pleasing experience for students and teachers.
- Teacher can present both self-created charts as well as existing Academic content in Digital whiteboard.
- Curriculum maker is a simple self-manageable tool kit to create/ customize digital curriculum. If School needs any assistance, our expert team offers instant support.
- We have 87 Innovative makers which will help students, Teachers to bring in next-gen Edtech experience .

Often schools face issues in creating a seamless mapping of Digital curriculum and Academic content. This is due to the fact that every publishing company has their own customized content.

This also led to enormous rework for teachers while presenting in the class.

There is also need of creating fresh worksheets, charts for revised content.

Our Innovative makers will address current content mapping challenges without a rework.

'Impossible !
What was thought impossible has just taken a little longer.

Discovery of truth...
Schools that proudly talk of holistic education, professional management and high quality infrastructure still compromise on the quality of their creative work by using the services of locally available – who are often not specialized in knowledge products.
Lack of availability of high quality R&D team and necessity to produce huge outputs within deadlines make schools struggle for the best results, in reality they become the victims of low quality services.
As we come to know recently while doing the creative services to Schools, we have had discovered the truth – that great help is required by schools. Every single school is looking for a quick and professional solution at their doorstep.

How

supports the Govt.& private initiatives

01

EDUCATION ENGAGEMENT

This proposal is focused on providing a solution to deliver a scalable, cloud-based e-learning resource service that improves teaching, learning outcomes for all patron-including students, parents, teachers, schools, the Department of Education by engaging in an educational infrastructure modernization program

02

TECHNOLOGY OVERVIEW

Myschool offers this big Data Management Platform, a data infrastructure solution, which delivers a highly flexible search engine for custom application development, automated data discovery, analytics and management with ingestion, migration, retention, disposition, disposal and tagging, and distribution solution. The platform offers real-time access of users concurrently based on flexible user permissions, rights and responsibilities

03

CENTRALIZED DIGITAL LIBRARY

- Centralized digital library delivering Scalable resources supply network & storage
- Support for streaming of all varieties of print and multimedia content file format
- Capture, indexing and querying of full text content metadata with arbitrary mark-up
- 24/7/365 platform for learning mobility and access to content anywhere at any time

04

CORE STUDENT REQUIREMENT

- Simple, engaging interface to access lesson content & enjoy the learning process
- Social presence & collaboration model for group work & studying between students
- Increased control over personal learning agenda & self-guided lesson selection
- Validated certification & profile area to share educational achievements

05

CORE PARENT REQUIREMENT

- Oversight of student performance, progress, challenges & learning needs
- View of student schedule, attendance & homework requirements
- Feedback mechanism to interface with teachers

06

CORE TEACHER REQUIREMENT

- Simple, yet powerful, interface for content authoring, lesson planning & structured class outlines
- Gamification & optional leaderboard to improve student engagement & educational outcomes
- Wide variety of grading, assessment & grade management tools, including mobile access

07

CORE SCHOOL REQUIREMENT

- Meet school teaching priorities & learning objectives
- Build multiple learning streams within a single lesson template
- Simplified scheduling & preparing resourcing timetable
- School-wide teacher comparison & student performance analytics

08

CORE EDUCATION DEPT. REQUISITE

- Identify and deliver centralized policies, normalize teaching approaches across all schools with in state /country
- Curriculum Implementation & ensure bodies observe to between school & student performance analytics
- Future proof evolution with educational & technological developments deployed

09

CORE CENTRAL ADMIN REQUISITE

- Highly available architecture with resilient, easily maintainable design
- Distributed cloud-based platform with local caching 24/7/365 content access
- Mobile optimized, device compatible & working with all major browsers
- Managed service with implementation, maintenance, support & ongoing included

10

CORE GOVERNMENT REQUISITE

- Collaborate on & share regional content & lesson planning to build best practices
- Support nursery, primary, secondary and learning disability educational goals
- Achieve effort scalability & efficiency through print and digital platform
- Divisional school comparison and student performance analytics is the core

How

supports the Govt.& private initiatives

01

EDUCATION ENGAGEMENT

This proposal is focused on providing a solution to deliver a scalable, cloud based e-learning resource service that improves teaching, learning outcomes for all patron-including students, parents, teachers, schools, the Department of Education by engaging in an educational infrastructure modernization program

02
